VHAT YOU NEED TO KNOW

GONORRHEA

GONORRHEA CAN EASILY BE CURED WITH ANTIBIOTICS!

Symptoms

Gonorrhea can have different symptoms for different people. Some people may be bothered by the symptoms, but others may not notice them. Even if you feel normal, you may have gonorrhea!

Symptoms In Women May Include:

- Painful or Burning Sensation During Urination (Peeing)
- •Increased Vaginal Discharge
- •Vaginal Bleeding Between Periods

Symptoms In Men May Include:

- •Burning Sensation During Urination (Peeing)
- •White, Yellow, or Green Discharge From Penis
- Painful or Swollen Testicles
- Men are more likely to experience symptoms than women!

Am I At Risk?

If you have unprotected sex (without a condom) you may be at risk for gonorrhea infection.

If you have multiple sex partners you are at greater risk for gonorrhea infection.

Many people do not experience any symptoms from gonorrhea! You may feel normal, but still be infected. Get tested to be sure you are not infected.

FOR YOUR RESULTS: Follow up with your healthcare provider if you have not been notified of your test results within 2 weeks of your test.

REMEMBER DO NOT HAVE SEX FOR 7 DAYS AFTER TREATMENT!!!!

Wyoming

Department

of Health

If you have gonorrhea or any other STD the Center for Disease Control and Prevention and the Wyoming Department of Health recommend you get tested for HIV as well.

It is extremely important that ALL of your sex partners are notified and tested for gonorrhea so they can be treated also

How Can I Learn More?

You can ask your doctor for more information about gonorrhea.

You can also contact the Wyoming STD Program at (307) 777 – 8939 for more information about gonorrhea and other Sexually Transmitted Diseases (STDs).

The following web sites provide information about gonorrhea, treatment and personal stories.
